There are a few steps required for setting up Eduroam on a Windows Laptop:

1. Go to Start/Control Panel/Network and Sharing Center and Click on **Manage wireless networks** in the left column.
2. Then Click **Add** to add a wireless network.
3. Select **Manual** connect to a wireless network.
4. Enter information like in the picture below:

- Network name: eduroam
- Security type: WPA2-Enterprise
- Encryption type: AES
- Security Key: 

Check Start this connection automatically

Do not connect even if the network is not broadcasting

Warning: If you select this option, your computer's privacy might be at risk.

Then click Next.
5. This should give you this display. Click on **Change connection settings**:
7. Make sure that the "Connect automatically when this network is in range" box is checked, then click the Security tab.
8. Make sure that the screen looks like the one below, then click **Settings** next to the **Microsoft: Protected EAP (PEAP)** box:
10. Make sure settings look like this, then click **Configure**:
12. UNCHECK THIS BOX. This is very important! Then click OK.

13. Click on OK until you are back at this box. This time, click **Advanced Settings**:
15. On the Advanced window, select **Specify authentication mode** and **User Authentication**. Click OK.

16. Enter your S&T credentials with @mst.edu in them.

17. Click OK all the way back. You should now be able to join Eduroam.
